AIIE TRANSACTIONS

Volume 6 — 1974

Subjects (coded) and titles

0100 Work Measurement

0160 Work Sampling

"Sequential Bayesian Work Sampling;" James R. Buck, Jose M. A. Tanchoco; December, page 318.

0200 Methods

0205 Non-repetitive Work Analysis Techniques

"A Biomechanical Evaluation of Two Methods of Manual Load Lifting;" Kyung S. Park, Don B. Chaffin; June, page 105.

"Effects of Operator Stance on Pushing and Pulling Tasks;" M. M. Ayoub, J. W. McDaniel; September, page 185.

0300 Facility Planning

"A Minimax Layout Problem on the Line Involving Distances between Classes of Objects;" Robert L. Papineau, Richard L. Francis; September, page 252.

0320 Plant Layout Procedures

"A Minimax Layout Problem on the Line Involving Distances between Classes of Objects;" Robert L. Papineau, Richard L. Francis; September, page 252.

0330 Materials Handling Analysis Techniques

"Analysis of Closed-Loop Conveyor Systems, the Discrete Flow Case;" Eginhard J. Muth; March, page 73.

0380 Transportation

"Transportation Routing Problem—A Survey;" Wayne C. Turner, Prabhakar M. Ghare, Leslie R. Fourds; December, page 288.

0400 Applied Psychology

0420 Biomechanics

"A Biomechanical Evaluation of Two Methods of Manual Load Lifting;" Kyung S. Park, Don B. Chaffin; June, page 105.

"Effects of Operator Stance on Pushing and Pulling Tasks;" M. M. Ayoub, J. W. McDaniel; September, page 185.

0435 Labor

"Heuristic Methods for Assigning Men to Machines: An Experimental Analysis;" Jeffrey G. Miller, William L. Berry; June, page 97.

0445 Learning

"The Effects of Learning on Optimal Lot Size Determination-Multiple Product Case;" George L. Adler, Ravinder Nanda; March, page 21.

"The Effects of Learning on Optimal Lot Size Determination-Single Product Case;" George L. Adler, Ravinder Nanda; March, page 14.

0500 Engineering Economics

"The Interaction of Economic Ordering Quantities and Marketing Policies;" S. Ladany, A. Sternlieb; March, page 35.

"Zeta Transforms, Present Value, and Economic Analysis;" Thomas W. Hill, Jr., James R. Buck; June, page 120.

"A Capital Budgeting Heuristic Algorithm Using Exchange Operations;" Clifford C. Petersen; June, page 143.

0505 Replacement Theory

"A Scoring Methodology for Equipment Replacement Model Evaluation;" Everett E. Adam, Jr., Michael F. Pohlen; December, page 338.

0520 Decision-making

"Planning Procedures for a Process Industry;" Henri L. Beenhakker, Jayant G. Sirdeshpande; June, page 126.

0600 Organization Planning

0635 Financial Planning

"Planning Procedures for a Process Industry;" Henri L. Beenhakker, Jayant G. Sirdeshpande; June, page 126.

0700 Materials Processing

"The Paper Trim Problem: A Variable Demand Analysis;" A. G. Beged-Dov; March, page 84.

0740 Inspection

"Tables for Determining Expected Cost Per Unit under MIL-STD-105D Single Sampling Schemes;" Gerald G. Brown, Herbert C. Rutemiller; June, page 135.

"Viewing Strategy and Window Effects on Dynamic

Visual-Inspection Accuracy;" James R. Buck, Anthony M. Rizzi; September, page 196.

"A Bayesian Approach to Controlling Per Cent Defective: A Model and Application;" Phillip L. Carter; September, page 235.

"Inspector Errors and Sampling Plans;" John E. Biegel; December, page 284.

0800 Production Planning and Control

"The Effects of Learning on Optimal Lot Size Determination-Single Product Case;" George L. Adler, Ravinder Nanda; March, page 14.

"The Effects of Learning on Optimal Lot Size Determination-Multiple Product Case;" George L. Adler, Ravinder Nanda; March, page 21.

"Branch-and-Bound and Heuristic Approaches to a Sequencing Problem with Team-Size Requirements;" Louis W. Miller; September, page 206.

"Interstage Storages for Three Stage Lines Subject to Stochastic Failures;" Joseph Masso, Milton L. Smith; December, page 354.

0805 Inventory Control

"Numerical Evaluation of Compound Poisson Distributions;" H. F. Van Landingham, Syed A. Shariq; March, page 50.

"A Generalized EOQ Model for Items with Weibull Distribution Deterioration;" George C. Philip; June, page 159.

"An Inventory Control Policy of the (Q,S,R) Type for Manufacturing Industries: Simulation Analysis Approach;" Muhittin Oral, J. L. Malouin, J. Brian Hobbs; December, page 345.

0810 Forecasting

"Planning Procedures for a Process Industry;" Henri L. Beenhakker, Jayant G. Sirdeshpande; June, page 126.

"Use of Isolated Forecasts in Markov Decision Processes with Imperfect Information;" D. M. Brooks, C. T. Leondes; September, page 244.

"Adaptive Forecasting with Orthogonal Polynomial Models;" David E. Clapp; December, page 359.

0815 Scheduling

"Scheduling Jobs on a Number of Identical Machines;" Salah E. Elmaghraby, Sung H. Park; March, page 1.

"Minimizing Mean Flowtime in the Flow Shop with No Intermediate Queues;" John M. Van Deman, Kenneth R. Baker; March, page 28.

"An Implicit Enumeration Algorithm for the Nonpreemptive Shop Scheduling Problem;" Said Ashour, T. E. Moore, Kung-Ying Chiu; March, page 62.

"Branch-and-Bound and Heuristic Approaches to a Sequencing Problem with Team-Size Requirements;" Louis W. Miller; September, page 206.

"Some Practical System Availability Calculations;" Richard J. Fox, Darrell R. Zerbe; September, page 228.

0820 Dispatching

"The Sensitivity of the Relative Effectiveness of Job Shop Dispatching Rules with Respect to Various Arrival Distribution;" Douglas A. Elvers; March, page 41.

"Heuristic Methods for Assigning Men to Machines: An Experimental Analysis;" Jeffrey G. Miller, William L. Berry; June, page 97.

"A Loading and Balancing Methodology for Job Shop Control;" Joseph C. Irastorza, Richard H. Deane; December, page 302.

0825 Routing

"Transportation Routing Problem–A Survey;" Wayne C. Turner, Prabhakar M. Ghare, Leslie R. Fourds; December, page 288.

0850 Stockkeeping and Warehousing

"Interstage Storages for Three Stage Lines Subject to Stochastic Failures;" Joseph Masso, Milton L. Smith; December, page 354.

0855 Control Models and Simulation

"A Mathematical Programming Production Model with Nonadditive Common Costs;" James Franklin Sharp; March, page 86.

"Heuristic Methods for Assigning Men to Machines: An Experimental Analysis;" Jeffrey G. Miller, William L. Berry; June, page 97.

"An Application of Sampling Inspection to Corrective Plan for Semi-Markov Production Process;" Shigeo Kase, Hiroshi Ohta; June, page 151.

"The Choice of Variables Sampling Plans Using Cost Effective Criteria;" J. W. Schmidt, K. E. Case, G. K. Bennett; September, page 178.

"A Bayesian Approach to Controlling Per Cent Defective: A Model and Application;" Phillip L. Carter; September, page 235.

"Systems Theory and Effective Quality Control;" Albert B. Bishop; December, page 275.

1000 Applied Mathematics

"An Implicit Enumeration Algorithm for the Nonpreemptive Shop Scheduling Problem;" Said Ashour, T. E. Moore, Kung-Hing Chiu; March, page 62.

"Analysis of Closed-Loop Conveyor Systems, the Discrete Flow Case;" Eginhard J. Muth; March, page 73.

"A Capital Budgeting Heuristic Algorithm Using Exchange Operations;" Clifford C. Petersen; June, page 143.

"A Generalized EOQ Model for Items with Weibull Distribution Deterioration;" George C. Philip; June, page 159.

"Branch-and-Bound and Heuristic Approaches to a Sequencing Problem with Team-Size Requirements;" Louis W. Miller; September, page 206.

"A Review of Some Cluster Analysis Methods;" James W. Kennedy; September, page 216.

"Some Practical System Availability Calculations;" Richard J. Fox, Darrell R. Zerbe; September, page 228.

"An Algorithm for Generating Gamma Variates Based on the Weibull Distribution;" John S. Ramberg, Pandu R. Tadikamalla; September, page 257.

"Sequential Bayesian Work Sampling;" James R. Buck, Jose M. A. Tanchoco; December, page 318.

"An Evaluation and Comparison of Some Tests for the Validity of the Assumption that the Underlying Distribution of Life is Exponential;" Leonard R. Lamberson; December, page 327.

"Adaptive Forecasting with Orthogonal Polynomial Models;" David E. Clapp; December, page 359.

"Long Division: An Example of Dynamic Programming;" Donald W. Boyd; December, page 365.

1005 Methematical Programming

"Scheduling Jobs on a Number of Identical Machines;" Salah E. Elmaghraby, Sung H. Park; March, page 1.

"The Paper Trim Problem: A Variable Demand Analysis;" A. G. Beged-Dov; March, page 84.

"A Mathematical Programming Production Model with Nonadditive Common Costs;" James Franklin Sharp; March, page 86.

"Sensitivity Analysis in Generalized Polynomial Programming;" Don T. Phillips; June, page 114.

"Use of Isolated Forecasts in Markov Decision Processes with Imperfect Information;" D. M. Brooks, C. T. Leondes; September, page 244.

"Geometric Programming via a Primal Auxiliary Problem;" G. B. Reklaitis, D. J. Wilde; December, page 308.

1010 Waiting Line Theory

"Minimizing Mean Flowtime in the Flow Shop with No Intermediate Queues;" John M. Van Deman, Kenneth R. Baker; March, page 28.

1015 Simulation Concepts

"The Sensitivity of the Relative Effectiveness of Job Shop Dispatching Rules with Respect to Various Arrival Distribution;" Douglas A. Elvers; March, page 41.

"On Generating Random Variates from an Empirical Distribution;" Hui-Chuan Chen, Yoshinori Asau; June, page 163.

"Simulation of Arbitrary Gamma Distributions;" Donald J. Wheeler; June, page 167.

"An Inventory Control Policy of the (Q,S,R) Type for Manufacturing Industries: Simulation Analysis Approach;" Muhittin Oral, J. L. Malouin, J. Brian Hobbs; December, page 345.

1020 Game Theory

"Alternative Process Models in the Economic Design of T^2 Control Charts;" Russell G. Heikes, Douglas C. Montgomery, Jimmy Y. H. Yeung; March, page 55.

1030 Probability Theory

"Numerical Evaluation of Compound Poisson Distributions;" H. F. Van Landingham, Syed A. Shariq; March, page 50.

"An Evaluation and Comparison of Some Tests for the Validity of the Assumption that the Underlying Distribution of Life is Exponential;" Leonard R. Lamberson; December, page 327.

1040 Acceptance Sampling

"The Choice of Variables Sampling Plans Using Cost Effective Criteria;" J. W. Schmidt, K. E. Case, G. K. Bennett; September, page 178.

"Viewing Strategy and Window Effects on Dynamic Visual-Inspection Accuracy;" James R. Buck, Anthony M. Rizzi; September, page 196.

"A Bayesian Approach to Controlling Per Cent Defective: A Model and Application;" Phillip L. Carter; September, page 235.

1045 Quality Control Techniques

"Alternative Process Models in the Economic Design of T^2 Control Charts;" Russell G. Heikes, Douglas C. Montgomery, Jimmy Y. H. Yeung; March, page 55.

"Tables for Determining Expected Cost Per Unit under MIL-STD-105D Single Sampling Schemes;" Gerald G. Brown, Herbert C. Rutemiller; June, Page 135.

"Systems Theory and Effective Quality Control;" Albert B. Bishop; December, page 275.

"Inspector Errors and Sampling Plans;" John E. Biegel; December, page 284.

1055 Statistical Theory

"A Review of Some Cluster Analysis Methods;" James W. Kennedy; September, page 216.

"An Algorithm for Generating Gamma Variates Based on the Weibull Distribution;" John S. Ramberg, Pandu R. Tadikamalla; September, page 257.

1100 Costs and Cost Control

"The Interaction of Economic Ordering Quantities and Marketing Policies;" S. Ladany, A. Sternlieb; March, page 35.

"The Paper Trim Problem: A Variable Demand Analysis;" A. G. Beged-Dov; March, page 84.

"Zeta Transforms, Present Value, and Economic Analysis;" Thomas W. Hill, Jr., James R. Buck; June, page 120.

1110 Inspection

"Tables for Determining Expected Cost Per Unit under MIL-STD-105D Single Sampling Schemes;" Gerald G. Brown, Herbert C. Rutemiller; June, page 135.

"An Application of Sampling Inspection to Corrective Plan for Semi-Markov Production Process;" Shigeo Kase, Hiroshi Ohta; June, page 151.

1120 Control Procedures

"The Effects of Learning on Optimal Lot Size Determination-Single Product Case;" George L. Adler, Ravinder Nanda; March, page 14.

"The Effects of Learning on Optimal Lot Size Determination-Multiple Product Case;" George L. Adler, Ravinder Nanda; March, page 21.
